

Entering Field Experiences

To enter a field experience, you must go to the Field and Clinical Program from the "Home" tab. Field and clinical experiences will include observations, weekly logs, and activity logs. Field experiences must be entered into the DRF within the Field and Clinical Program.

1. Log into TaskStream and click on "Home." You should be enrolled in at least two programs. One program is your major field of study. The other is your field and clinical experiences throughout your program.
2. Click on the DRF Program for your Field and Clinical Experiences.

3. Field experiences will be listed for each course that requires them. Click on the folder under the respective course. Next Click on "Complete this form".

4. The field and clinical experiences for each class can be submitted **only once** a semester. You will go to the submission area to submit all the field experiences only after you have completed ALL of them.
