

Notification of Asbestos

An asbestos survey of all the buildings on campus will be completed on an established re-inspection schedule. A building is required to have an asbestos survey every three years to inspect the condition and location of asbestos containing material. The results of the survey are compiled in management plans according to the requirements set forth by the Department of Environmental Quality Required Elements Index .These management plans are available for review in the ULM Safety Office, Physical Plant Room 206. If you need any additional information, please contact Lindsay McNair at 342-5177.
