

# Art 405 074 Exam one

Credit earned on 20 questions by ten students

## Data Graphics

The visual display of quantitative information

The data graphic at left is a small multiple. The points earned for each question are plotted on a bar chart that presents two variables, the number of students and the point value per question.

Once the basic unit is understood, the collection is easily understood and compared.

Less is more. The white lines provide easy reference to the data.
