

Institutional Biosafety Committee

Annual Report: 2018-2019 Academic Year

The IBC received a protocol to review from the College of Pharmacy. A meeting of the IBC was called to review the application on May 2, 2019. Since the IBC only meets when applications are received, this was the only meeting called for the academic year. The committee chair did conduct a survey of research on campus to determine if projects were planned that may require IBC review. The chair will follow-up as needed with researchers regarding the need for IBC application review.
