

## **Institutional Biosafety Committee**

5/17/16

End of the Year report

The 2015-2016 Institutional Biosafety Committee thus far has not been active. The committee only meets when it receives applications for project review or to meet a requirement that the committee meets at least once/year.

A meeting is planned for June as a project application was recently received.

Due to lack of activity, I did not generate an individual evaluation for each member.

I am requesting that Dr. Srinivas Garlapati join the committee and replace Dr. Heath Barnett. He has expertise in biosafety and would be a valuable addition.
