

Radiation Committee

Organizational Meeting

1/11/2019

Present: Dr. Andy Allen, School of Health Professions – Radiologic Technology
Jordan Anderson, School of Health Professions – Dental Hygiene
Buddy Barnett, School of Sciences - Chemistry
Dr. Karen Briski, School of Pharmacy & Toxicology
Michael Davis, Director of Facilities & EHS
Shane Dykes, Environmental, Health & Safety Officer
John Herrock, School of Pharmacy – Toxicology EHS Officer
Mark Kerry, College of Arts, Education, & Science – Facilities Manager

License Renewal

Mr. Dykes explained the new application process for the radiation license that was nearing expiration. Each committee member was asked to confirm inventory of radioactive equipment and isotopes and was given the most recent copy on file. They were asked to return the inventory sheet with any changes within two weeks.

Radiation Audit

Mr. Dykes reviewed the process of the bi-annual radiation audit that we anticipate happening sometime next month. Departments were asked to double check license postings and leak test results in the vicinity of the machines. The annual calibration of University Geiger counters was discussed as they are due next month also.

Ongoing Studies

Each program was asked to briefly discuss any upcoming changes to their programs. There are no changes to the four chromatographs that Biology and Pharmacy use. There are no plans to purchase or use radioactive isotopes in the near future. One scintillation counter at the School of Pharmacy was marked for surplus to LPAA. Mr. Dykes will start the paperwork to have the sealed source removed prior to shipping.
