Use the Outlook for Android app

NOTE: Outlook for Android requires a device running Android 4.0 or later.

View these steps in a video.

By using the Outlook for Android you can access your email, calendar, contacts, and OneDrive files from within the app rather than having to check separate apps.

NOTE: You cannot access tasks from the Outlook for Android app.

Download the Outlook for Android app from the Google Play store if you haven’t installed it yet.

If you already have it installed, open it and then depending on your device, tap the navigation control at the bottom of your Android, or tap More > Settings > Add Account.

Tap Office 365 if you have a work or school account in Office 365 for business.

Use the built-in Android mail app

View these steps in a video.

Tap Settings > Accounts > Add account > Email.
Enter your full email address, for example myname@ulm.edu or myname@warhawks.ulm.edu. Type your password, and then tap Sign in.

**NOTE** If you previously selected Exchange to set up your account you may receive a message about security upgrades and you need to re-sign in. Follow the prompts and sign in with your full email address and password.

Outlook for Android then starts syncing the account.
To view your calendar, files, or contacts from the app, tap **More**.

You can have more than one account in Outlook for Android. Select the type of account you want to add and follow those steps.

**Delete an account**

Depending on your device, tap the navigation control at the bottom of your device, or tap **More > Settings**. Tap the account you want to delete. Select **Remove Account from Device and Remote**.

Type your full email address, for example *myname@ulm.edu* or *myname@warhawks.ulm.edu*. Type your password, and then tap **Next**. Select the **Exchange** option. Depending how the Office 365 administrator in your organization set up your account, you might receive a message about additional security features. Select **OK** to continue.

Remote security administration

Server *outlook.office365.com* must be able to remotely control some security features on your device. Continue?

CANCEL   OK

Once the device verifies the server settings, the **Account Options** page opens. Accept the defaults or select the options for how you want to receive and send your mail, and then tap **Next**. (You may need to scroll down to see **Next**.)
On the **Set up email** page you can change the name of your account. When you’re finished tap **Done**.

If you synced your calendar and contacts in step 5 you can go to those apps on your phone to view any items that might be there. If you synced tasks as well, you should see them in the calendar app on your device. It might take a few minutes for everything to sync.

If your device can’t connect make sure you typed your email address and password correctly and try again. If you still can’t connect try setting it up manually following the steps below.

**Manual set up**

Tap **Settings** > **Accounts** > **Add account** > **Email**.
Type your full email address, for example myname@ulm.edu or myname@warhawks.ulm.edu. Type your password, and then tap Next. Select Manual.

Review the settings on the Exchange server settings page and update if necessary.

**Email** Make sure your full email address is in this box, for example, myname@ulm.edu or myname@warhawks.ulm.edu.

**Domain\Username** Type your full email address in this box.
If Domain and Username are separate text boxes in your version of Android, leave the Domain box empty, and type your full email address in the Username box.

**Password** Use the password that you use to access your account.

**Exchange Server** The server name for Office 365 for business is outlook.office365.com.

Make sure the Use secure connections (SSL) box is checked.
