

UNIVERSITY OF LOUISIANA MONROE

The University of Louisiana at Monroe is required to follow policies set forth by the University of Louisiana System Board of Supervisors. In order to adhere to these state guidelines, all students under the age of 21 are required to live on campus unless they meet the criteria for an allowable exemption. One of the allowable exemptions is a severe medical condition, which is considered to be an accommodation that cannot be reasonably met by the University.

In order to meet student needs, ULM provides maintenance assistance for those who need a reasonably controlled environment (e.g., asthma, allergies) and for those who need special structures (paraplegic/quadruplegic.) ULM Student Health Services provides patient services and consultations. Allergy injections are given when the student provides the medication with orders and instructions by the family physician. Where special diet is a medical requirement, the ULM Student Health Services and campus dining services dietician will review the diet and prepare meals separately to meet the student's needs. Please provide a detailed copy of restricted diet. University Housing Office, Campus Dining Services, Student Health Services and maintenance will make a coordinated effort to meet the student's needs for medical reasons.

ATTENTION PHYSICIAN: *The fields below should be completed in their entirety.*

ATTENTION STUDENT: *Your request must be submitted with a completed Off-Campus application form, notarized statements and/or letters of support from parent/legal guardian and copies of pertinent medical records relative to this request. Submission of these forms DOES NOT imply that an exemption from the University's mandatory housing requirement has been or will be granted.*

Student Name _____ CWID# _____

Describe nature of condition or illness: _____

How long has illness/condition existed? _____

Date student last treated for illness? _____

If this illness/condition requires special accommodations, conditions and/or diet, and these conditions could be met while residing in the residence hall and patronizing the dining facilities, do you feel it would be acceptable for this student to live in the residence hall? (Please feel free to call us concerning our residence hall policies, practices and current situation, Ph: 318.342.5242)

What are the required special conditions? _____

If you feel this student will be better served living off-campus, please briefly explain why. _____

Physician Name/Office Stamp _____

Physician Signature _____ Date _____

Address1 _____

Telephone _____

Address2 _____

Email Address _____
