

UNIVERSITY OF LOUISIANA MONROE

The University of Louisiana at Monroe is required to follow policies set forth by the University of Louisiana System Board of Supervisors. In order to adhere to these state guidelines, all students under the age of 21 are required to live on campus unless they meet the criteria for an allowable exemption. One of the allowable exemptions is a severe medical condition, which is considered to be an accommodation that cannot be reasonably met by the University.

In order to meet student needs, ULM provides maintenance assistance for those who need a reasonably controlled environment (e.g., asthma, allergies) and for those who need special structures (paraplegic/quadruplegic.) ULM Student Health Services provides patient services and consultations. Allergy injections are given when the student provides the medication with orders and instructions from the family physician. Where a special diet is a medical requirement, the ULM Student Health Services and campus dining services dietitian will review the diet and prepare meals separately to meet the student's needs. Please provide a detailed copy of the restricted diet. University Housing Office, Campus Dining Services, Student Health Services, and maintenance will make a coordinated effort to meet the students' needs for medical reasons.

ATTENTION PHYSICIAN: *In order to guarantee privacy, medical documentation must come directly from the physician to ULM. The fields below should be completed in their entirety. Your assistance is greatly appreciated!*

ATTENTION STUDENT: *Your request must be submitted with a completed Off-Campus application form, notarized statements, and/or letters of support from the parent/legal guardian, and copies of pertinent medical records relative to this request. Submission of these forms DOES NOT imply that an exemption from the University's mandatory housing requirement has been or will be granted.*

Student Name: _____ **CWID#:** _____

Describe the nature of the condition or illness: _____

How long has the illness/condition existed? _____

Date student last treated for illness? _____

If this illness/condition requires special accommodations, conditions, and/or diet, and these conditions could be met while residing in the residence hall and patronizing the dining facilities, do you feel it would be acceptable for this student to live in the residence hall? (Please feel free to call us concerning our residence hall policies, practices, and current situation, Phone: 318.342.5242)

What are the required special conditions? _____

If you feel this student will be better served living off-campus, please briefly explain why. _____
